Corporate Justice*Second Edition*

Todd J. Clark, Dean, Widener University Delaware Law School
 andré douglas pond cummings, Dean, Widener University
 Commonwealth Law School

Casebook, Forthcoming April 2025, ISBN 978-1-5310-2961-6
Teacher's Manual forthcoming

Corporate justice is more than corporate social responsibility. It acknowledges the exciting and important role a successful corporation can play in the lives of the founders, stakeholders and communities with which that business interfaces. While recognizing this role, corporate justice expects that founders, stakeholders, and executives in a business will honor human potential and eschew profits when such derives from unfairness, inequality, danger and damage. The second edition updates these themes by examining corporate board diversity and corporate reparations in light of the murder of George Floyd, the myriad corporate commitments to ending institutional racism following global protests, and the resultant backlash against “woke” capitalism and Critical Race Theory.

Criminal Procedure is designed to teach the so-called “bail to jail” facets of criminal procedure. The focus is on those important, and often ignored, stages of the criminal process that start with the decision to pursue criminal charges and end with various post-conviction options. CRITICAL RACE THEORY

A Critical Race Approach to Systemic Inequity

Rory Bahadur, Washburn University School of Law

Forthcoming summer 2025, ISBN 978-1-5310-3313-2, paper

This book illustrates the reality of American systemic inequity by carefully dismantling the cognitive illusions that undergird American exceptionalism and meritocracy. The result is a disorienting and painful reveal of an American reality based almost entirely on systemic inequity. The dilemma the book develops and explores is that the identical reframing mechanisms that render systemic inequity normative and moral are also essential for human societies to exist and for our position as an apex species on the planet. Dismantling systemic inequity therefore is a much more difficult task than most currently understand. It has nothing to do with changing individual attitudes but rather it requires a complete and disruptive revision of what we currently understand as humanity.

This casebook emphasizes important circuit court decisions together with relevant Supreme Court case law. This enables students to see how principles articulated in Supreme Court decisions are implemented by lower courts. It also addresses affirmative duties, constitutional tort actions in state courts, and attorney's fees. Further, this book is organized around the statutory language of Section 1983, thereby driving home the crucial distinction between prima facie cases and constitutional tort immunities and defenses. *Constitutional Torts* provides a thorough treatment of compensatory damages, punitive damages, injunctive relief, and attorneys' fees. These materials not only explain the basic doctrine, but explore their strategic implications on the conduct of litigation.

WILLS, TRUSTS, AND ESTATES

Mastering Trusts and Estates
Second Edition

Gail Levin Richmond, Nova Southeastern University College of Law,
Emerita

Forthcoming March 2025, ISBN 978-1-5310-3144-2, paper

Mastering Trusts and Estates explains the rules for transferring property interests during the owner's life and at his or her death. In addition to transfers covered by wills and trusts, it covers transfers by intestate succession, outright gift, survivorship tenancy, and beneficiary designation. Discussion includes the transferor's goals; the effect of events, such as a beneficiary's death or decision to disclaim, that interfere with meeting those goals; default rules that apply when the transferor failed to anticipate events; and language a transferor can use to attain the outcome he or she desires. Students will see how the various ways for transferring property resemble each other, how they differ, and how they interact with each other. There are numerous examples illustrating the relevant concepts.

Changes to the Uniform Probate Code and the Uniform Parentage Act are included, as are innovations referencing artificial intelligence, the Electronic Wills Act, the Electronic Estate Planning Documents Act, and the Cohabitants Economic Remedies Act. Federal and state statutes are introduced, specifically newly enacted ones seeking to curb rising incidents of elder financial abuse, as well as describing the interplay of taxes and wealth transfer.
